Find us on: Twitter: Facebook: LinkedIn: Software applications are the backbone of software development. Most of them are written by developers. As a result of this, software applications are sometimes very complex and confusing. This can pose a serious challenge when trying to search through them. In such cases, the search can only be performed manually. With time, this becomes difficult and tedious. In this video, we'll learn how to convert your MySQL Database into JSON format to save and share the data with others. We are currently using PHPMyAdmin to import the database and save it as JSON file. JSON is very easy to use and can be easily shared with others. The good news is that emailing is one of the most convenient ways to stay connected. The bad news is that email is also one of the most complex ways to communicate. No matter how good or easy a particular email program is to use, one of the most challenging aspects of emailing is knowing what to write in the email to send it. In this article, we'll go over some best practices for writing great emails. You'll learn about: Emailing is complex, so make your emails the best they can be Email etiquette and email rules When to email and when to call How to keep the email conversation flowing With clear, focused, and useful content, you can write great emails, which will help you get what you want. Emailing is complex, so make your emails the best they can be You've probably heard that emailing is like writing. Emailing is a complex form of communication, and the same rules apply for email as for any form of communication. That's why it's important to make your emails the best that they can be. The best content will keep your audience's attention, it will make them want to read the email, and it will get them what they want. For a well-written email to be successful, it needs to answer these questions: When should I use email? When should I call instead? What's the difference between email and phone calls? When should I call instead? When should I use email? You use email for different purposes. Here are the most common reasons to use email: To get something done Emailing can be a quick way to get things done. It's easy to type out a quick email and then send it, instead of writing a detailed letter on a piece of paper. To make things clear Email is great for keeping the conversation going with different people. Instead of writing an email with one person and sending it to another, it's better to write a single email and send it. To share something or ask something When you need to send a detailed message or you need to ask a question, it can be better to write an email. Email is the best medium for communicating complex things, and you can often send attachments if you need to. To use social media or other types of messaging tools With modern messaging apps, it's easy to keep in touch with people online. Email can help you stay in touch in a way
